COVID-19 Aerosol Generating Procedures (AGP)

- Intubation & Assist**
- Extubation**
- Bag/mask Ventilation
- Mechanical Ventilation
- CPR
- All Nebulized Medication Delivery
- All Airway Clearance Modalities
- All NIV (CPAP / BiPAP) including overnight
- HFNC (High Flow Nasal Cannula)
- Non-Closed Suction Techniques**
- Humidified Trach Collars
- Open Surgical Airways
- Percutaneous Trach Procedure**
- Bronchoalveolar Lavage (blind BAL)**
- Bronchoscopy & Assist**
- Pulmonary Function Testing
- Laryngeal / Vocal Cord Visualization**
- Upper Endoscopy**
- TEE Procedure**

** Examples of Instrumentation of the Airway

For all AGPs, including instrumentation of the airway, with PUIs, maintain airborne precautions (in location where procedure occurred) for:

- 1 hr post AGP if in neutral or retrofitted room.
- 30 min post AGP if in negative or positive pressure room.

This practice will vary in Urgent Care and OR

Please adjust workflows to limit the number of times/number of people that must enter a patient room during this time.
