

ALT Reference Range Change.

Clayton Wilburn, MD
Medical Director Chemistry
(802) 847-5121

On 9/1/2019 the clinical laboratory will upgrade to the next generation ALT assay on our Ortho Clinical Diagnostics Vitros 5600 platform. The test name and ordering process will remain the same. The new generation ALT assay comes with a reference range update from the manufacturer. **The current reference range for Males and Females >18 years old is <72 U/L and <53 U/L, respectively and the new range is <50 U/L and <35 U/L, respectively.** This updated reference range has been verified by the lab in internal studies. Correlation studies between the new and current generation assays are excellent.

If you have any questions concerning this change please contact Dr. Clayton Wilburn in the laboratory.
